

ABSTRACT OF THE DISCLOSURE

SWB
B2

Data signal for modification of a graphic scene with corresponding method and device

5 The invention relates to a data signal for the modification of a graphic scene, intended as means for the construction of images that can be shown on at least one screen, that comprise frames for up-dating the graphic scene, certain of said frames carrying a command for replacement of the existing graphic

10 scene by a new graphic scene. Advantageously, they also carry at least one of the commands belonging to a group including the following commands:

- insertion of an element of said graphic scene
- modification of an element of said graphic scene
- deletion of an element of said graphic scene

15 said means of construction up-dating said scene in relation to said up-date frames.

The invention also relates to a corresponding method and device.
